Prevent Asset Strikes

AUSTRALIAN MAD AND OWNED

Introducing the "Insulated Shovel" Electrical isolating Shovel

For those who are working in electrically unsafe environments, you need a safety tool to protect against accidental electrical cable strikes and electrocution whilst conducting civil works.

The **"Insulated Shovel"** is a non-conductive shovel that does not conduct electric currents ensuring operators are completely protected.

The shovel head provides excellent electrical isolation whilst being a great shovel.

Item	Feature
Weight	2.5kg
Length	1.59m
Shovel Dimensions	280x 210mm
Shaft Diameter	40mm
Shaft Type *	Carbon Fibre
Shovel Head Material (or equivalent)	Grivory GVX-65H
Electrical Standard*	IEC 600933
Specific Volume Resistance*	Dry 10^{10} Cond 10^{12}
Specific Surface Resistance*	Cond 10^{12}

* Specifications – please refer to our website for current specifications & Terms and conditions

Electrically Isolating Shovel Head

Practical Digging Tool

Critical Safety Tool
